Remark Classic OMR 6.2

May 2020

⭐ indicates customer request

Features and Enhancements:

- *Generic Keys Support Multiple Test Versions.* Support was added for both Standard and Advanced multiple test versions when saving and loading generic answer keys.

Fixes:

⭐ - *Duplicate Answers:* An error was eliminated when grading with a template that contains duplicate answers for a question.

- *Managing Email Template in Report Batches:* An "Index out of bounds" error was corrected when you attempted to "manage" the email template when generating Report Batches.

⭐ - *Error #5800 with Item Analysis Reports:* An error #5800 was corrected when generating the Item Analysis reports in certain situations.

⭐ - *Empty PDF of Crosstab Report:* A problem with an empty report was fixed when exporting the Crosstab report from within an automation (REZ) file.

⭐ - *Importing/Exporting Grade Scales:* An error #438 was corrected when importing and exporting grade scales.

⭐ - *BeforeKey Error when Analyzing Multiple Data Sets:* A "BeforeKey" error was corrected when attempting to analyze more than one data set at a time.

⭐ - *Analysis Group Report Missing Last Graph:* A problem was fixed where the Analysis Group report was not displaying the graph for the last question.

⭐ - *Question Weights Set to 0:* A problem was fixed where the question weights in Advanced Survey defaulted to 0 instead of 1.

⭐ - *Error Importing Text Keys.* An error message was corrected when importing textual answer keys that use advanced multiple test versions in Advanced Grade.

⭐ - *Inconsistencies in Header of Test Item Data Export.* The headers were only being included in the file under certain circumstances, which has been fixed so that they always display.

- *Index out of Bounds Error:* An Index out of Bounds error was corrected when exporting to the Pinnacle and Blackboard gradebooks.
