Remark Web Survey 5.4 New Features

We have made numerous enhancements to Remark Web Survey in the 5.4 release. We hope you enjoy the new version!

Fixes

- A problem was fixed where the backup RWSX file that is uploaded to the server during form publishing would become corrupt.

New Features

- **Microsoft Office 2013 support**: Data can be exported to Microsoft **Excel** and **Access** 2013 formats (and higher).
    - o The 255 column limit and overwrite-only limitations have been removed from the Excel export.
- Added the **CSV** export format.
- The **StatPac** export format was added for exporting data into **StatPac.**
- **Custom Text Export Update:** The Custom Text format received an overhaul, making it easier to use.
- Added the ability to save data to **Google Drive** and **Dropbox** accounts.
- **Remark Quick Stats® – analysis & reports** (We have included many changes to the functionality in Remark Quick Stats including a new look and feel, new reports, and more)
    - **General analysis updates:**
        - **New streamlined interface for report customization:** Easier interface to customize built-in reports (change headers, fonts, colors, show/hide statistics and more!).
        - **Ability to adjust report labels:** Added the ability to change some of the report labeling options in the Report Properties screen.
        - **Create report groups for task pane:** New report groupings added to the Remark Quick Stats task pane to make finding reports easier. You can also add reports to a Favorites list for easy access.
        - **Include Number of Respondents:** You can include the total number of respondents in the survey or test in the report header.
        - **New Excel export:** A new Excel export was added that creates a spreadsheet with one report on each tab of the workbook.
    - **Survey analysis:**
        - **Integrated Item Analysis Report:** This report combines our Condensed Item Analysis and Response Reports for easy distribution and viewing of quantitative data and open ended responses. This is a great report for course evaluations, session evaluations and a variety of other survey projects.
    - **Test grading analysis:**
        - **Partial credit questions:** Added support for awarding partial credit for test questions.
        - **More robust learning objective support.** You can now apply individual grade scales to each learning objective on a test. You can also add a longer description to the learning objectives.

- **Separate Scaled Scores for Learning Objectives:** Separate scaled scores can now be applied to individual learning objectives.
- **Test version support for Item Analysis Reports:** You can now run Item Analysis reports when using standard multiple answer keys.
- **Include Answer Key Option in Export:** The ability to include the answer key was added to the numeric and textual data export formats in Remark Quick Stats.
- **Updated the Student Statistics Report**: Added a percent column to the Student Statistics Report in the objective and subjective columns. Also adjusted how extra credit questions appear on the report.
- **Always exclude answer key in custom gradebook export:** Added the ability to always exclude the answer key when exporting grades to the custom gradebook format.
- **Class Learning Objectives Report sorting:** When using the sort objectives property in the Class Learning Objectives Report, the overall line is no longer included in the sort.
- **New test grading reports:**
  - **Student Response Similarities Report:** A new report was created that shows students with similar responses. You can control the similarity threshold.
  - **Student Achievement Report:** An Achievement Report was added to show comparisons to the test benchmarks.
  - **Comparative Item Report for Grading:** A Comparative Item Report was added when grading tests and lists the percent correct for each question based on criteria of your choosing. You can optionally calculate a benchmark using the average percent correct for all students.
- **New Gradebook Exports:**
  - Standard: A generic CSV gradebook export was added to enable universal integration with gradebooks and student management systems.
  - Pinnacle®
  - Canvas®
  - Sakai®
  - Moodle®
